

## 73" UV Press Installation Complete

We are proud to announce that our new 73" six color, UV press is in place and ready to roll. Features include an automated plate change system, a quick change coating setup and computer controlled inking. In addition to its very large sheet size (51 x 73), this press offers many other benefits like fast makereadies, full automation and precise color control. It is rated to run 10,000 sheets per hour. There are less than ten presses like it in the country, and we are excited to add it to our long list of print capabilities.

FCP Management Team

- Flower City Printing was featured in an article entitled "Going Above and Beyond" that appeared in the June 2008 50th Anniversary issue of *Printing Impressions* magazine.

- We are ranked 93rd in the 2008 listing of the Top 101 Printers in North America compiled by *Graphic Arts Monthly* magazine.

- Thirteen customers attended the Flower City Print Academy™ held in May. It included instruction and hands-on experience at our facility as well as a half day session at Rochester Institute of Technology.

## The FCP Edge: UV FLEXO Capabilities

We recently installed a narrow web flexo press to offer you even more print options. This versatile, 8-color 13" UV press can print on a wide range of substrates from pressure sensitive to thin films and special papers. It can die cut, slit, and rewind and is perfectly suited for tags, labels and specialty packaging applications.

## We are Las Vegas Bound in 2009!

FCP® will be exhibiting in Booth #6655 at GlobalShop 2009 in Las Vegas March 23 - 25.
